

# Ivan Vaccari

Ph.D. in Computer Science, Computer Engineer

Italian

▶ Born: 13/07/1991

### Skills

Software development

Cyber security

Internet of things

Machine learning

Big data/ Data science

Distributed legder technology

**Cloud computing** 

Italian L1

**English** Good

## **Biography**

Ivan Vaccari (IV) obtained his PhD in Computer Science and Degree in Computer Engineering, with 110/110 cum laude, from the University of Genoa (UNIGE) in 2017 and 2021 respectively. IV received the award for best thesis from the ABB company on theme "Digitization through the Internet of Things in the power generation industry and Smart grids and smart cities" carried out in collaboration with the Institute of Electronics and Information and Telecommunications Engineering (IEIIT) of the National Research Council (CNR). During the PhD, carried out in collaboration with the CNR-IEIIT, IV focused his research on the issue of cybersecurity applied to the development and identification of particularly advanced cyber threats relating to the Internet of Things (IoT) context. In particular, IV has actively worked on identifying vulnerabilities of IoT networks and devices, widely used in many infrastructures such as industry 4.0, hospitals, banks, power plants, to protect and make communication between devices secure. The activities focus on the development of cyber-attacks on different protocols, such as MQTT, ZigBee or Wi-Fi, to exploit the identified vulnerabilities and the related protection systems based on innovative algorithms or machine learning techniques. IV is the author of over 15 international scientific papers, he has played the role of reviewer for over 30 research papers in international sector conferences and journals. Over the years, IV has acquired experience in the management of national and international research projects, as regards scientific, technical and organizational activities. During the research period, IV was directly involved in project activities of an international and national nature, actively participating in the practical development of the projects and in the organizational part of the activities. IV participated in numerous project meetings representing the CNR group, contributing to the success of all projects. Projects have resulted in scientific publications in international journals and conferences. Furthermore IV, in recent years, has actively collaborated with other research groups of the CNR, such as the machine learning and bioengineering group.

# Work experience

Software Engineer

RINA

07/2021 - present

Software Engineer in charge to develop DevOps solution for clients.

Ph.D. student

10/2017 - 05/2021

University of Genoa

PhD student in Computer Science at the University of Genoa (cycle XXXIII). Supervisor: Alessandro Armando, Maurizio Aiello, Enrico Cambiaso

Research fellow

06/2019 - 06/2021

CNR, Institute for Electronics and Information Engineering and Telecommunications

Research fellow at the Genoa Network Security group of the CNR Institute for Electronics and Information Engineering and Telecommunications, for the activities related to "Development of innovative solutions in the cyber-security land-scape". Scientific responsible: Dr. Enrico Cambiaso. Selection announcement n. IEIIT-001-2020-GE. Supervisor: Maurizio Aiello, Enrico Cambiaso

### Education

10/2017 - 05/2021

#### Ph.D. in Computer Science

University of Genoa

Internet of Things, cyber-security Master's thesis: ""Security aspects about Internet of Things networks, devices and protocols".

09/2014 - 03/2017

# Master's degree in Computer Engineering

University of Genoa

Computer Engineering
Bachelor's thesis: "Study of security aspects on ZigBee networks in Internet of Things".

09/2010 - 09/2014

# Bachelor's degree in computer engineering

University of Genoa

Computer Engineering.

#### Research fellow

06/2019 - 05/2020

CNR, Institute for Electronics and Information Engineering and Telecommunications

Research fellow at the Genoa Network Security group of the CNR Institute for Electronics and Information Engineering and Telecommunications, for the european project "Integrated Framework for Predictive and Collaborative Security of Financial Infrastructures – FINSEC ". Scientific responsible: Dr. Enrico Cambiaso. Selection announcement n. IEIIT-003-2019-GE. Supervisor: Maurizio Aiello, Enrico Cambiaso

#### Research fellow

06/2017 - 05/2019

CNR, Institute for Electronics and Information Engineering and Telecommunications

Research fellow at the Genoa Network Security group of the CNR Institute for Electronics and Information Engineering and Telecommunications, for the european project "My Health - My Data (MH-MD)". Scientific responsible: Dr. Maurizio Aiello. Selection announcement n. IEIIT-006-2017-GE. Supervisor: Maurizio Aiello, Enrico Cambiaso

# Competence acquired

- Good knowledge of the functioning of network devices, both in theoretical and practical terms
- Knowledge of network protocols: IEEE 802.11, IEEE 802.15.4, IEEE 802.3, Wi-Fi, ZigBee, HTTP/HTTPS, MQTT
- Network Engineering: TCP/IP Architecture, IP Routing, ISO/OSI, Bridging/Switching, Firewall, IDS and IPS
- Good knowledge of cloud and storage systems and backups on physical devices such as NAS or tape
- Excellent knowledge of Internet of Things (IoT), both in hardware, software and cyber security
- Development of IoT applications using different communication protocols, depending on the implemented applications
- In-depth knowledge of Docker container systems and classic virtualization
- Knowledge of the Vulnerability Assessment and Penetration test processes
- Programming languages: Python, Matlab, C++, C#, Java, Databases (SQL and NoSQL), Blockchain, Cloud Platform (Google Cloud, AWS, Azure)
- Machine learning, advanced knowledge and algorithm (developed in Python)

### Project involved

- European project "Advanced Networked Agents for Security and Trust Assessment in CPS/IOT Architectures (ANASTACIA)".
- European project "Maturing and Extending the FREETOOL Tool development Initiative".
- European project "MyHealthMyData (MHMD)" .
- European project "Integrated Framework for Predictive and Collaborative Security of Financial Infrastructures (FINSEC)" .
- National project "Monitoring And Rescue Automation (MAREA)"
- National project "Cyber security delle infrastrutture critiche (CYBIC)".

- National project "Advances in Pneumology via ICT and Data Analytics (PNEULYT-ICS)".
- National project "CASTORE".
- National project "5G" in collaboration with Vodafone.

### **Teaching activities**

- Teaching with lessons entitled "IoT security" in the STRATEGOS Master's Degree course at the University of Genoa, year 2020.
- Teaching support activities for the course of Algorithms and Data Structures, year 2020, in the course of Computer Science at the University of Genoa
- Teaching support activities for the Advanced Data Management course, year 2018, in the course of Computer Science at the University of Genoa
- Teaching support activities for the course of Algorithms and Data Structures, year 2018, in the course of Computer Science at the University of Genoa
- Teaching support activities for the Mobile development course, year 2019, in the course of Computer Science at the University of Genoa

### **Conferences**

• Vaccari, I., Cambiaso, E., Aiello, M. (2019). Security aspects about Internet of Things networks and devices

Computer Science Workshop 2019

Ph.D. program in Computer Science and Systems Engineering, Università degli studi di Genova

• Vaccari, I., Cambiaso, E., Aiello, M. (2020). Security aspects about Internet of Things networks and devices

 $\label{eq:ph.D.} Ph.D. \ forum \ poster \ session \ and \ presentation \\ ITASEC20$ 

• Vaccari, I., Aiello, M., Cambiaso, E. (2020) Exploiting low-powerful IoT devices to perpetrate network attacks

Poster session IWSEC2020

 Vaccari, I. (2020) Security aspects about Internet of Things networks, devices and protocols

Ph.D. forum poster session and presentation ICISSP2020

### Reviewer activities

- Reviewer for more then 20 papers in international journals and conferences
- PC Member of the FINSEC'19 event organized during the "Twenty-fourth European Symposium on Research in Computer Security (ESORICS 2019)
- Member of the Editorial Board of the AS Computer Science (ACTA Scientific) international journal.
- Member of the PhD Program Committee for ITASEC20 event.
- Member of the Editorial Board about the journal Computer Engineering Studies

### Certification

In possession of more than 40 certifications relating to software development and the cyber-security aspect. The most relevant are:

- eLearnSecurity Web Application Penetration Tester (eWAPT) number 6857335, relating to the study of vulnerability assessment and penetration testing activities for web applications.
- eLearnSecurity Junior Penetration Tester (eJPT) number EJPT-200663, related to the study of vulnerability assessment and penetration testing activities.
- Cyber Security and Cyber Security essentials obtained on 29/01/2018 provided by Cisco Networking Academy concerning the exploration of the topic of cyber-security as a specialization in the IT field.
- Autopsy Basics and Hands On released by Basis Technology Training Center on 30/07/2020.
- Microsoft Al Classroom Series released by Microsoft on 01/28/2021.
- MATLAB Deep Learning Onramp released by MathWorks Training Center on 05/19/2020.
